The National Fire Protection Association (NFPA) says that vehicle fires account for about 20 percent of all reported fires, so it's worth knowing how to reduce some of the risk in your own car or truck. (Creative Commons/Flickr/qwrty) There's rarely a single cause for any given car fire, even if an investigator can trace all the way back to ...

Top 10 Causes of Car Fires | HowStuffWorks

It's one of the most common reasons why a car jerks when accelerating. Your car's engine needs both fuel and air to do its work. The air mixes with the fine spray of fuel inside the engine and is then lit by the spark plug, causing a controlled explosion, which moves the pistons.

Car Jerks When Accelerating? Here's Why and How to Fix It.

the process by which our sensory receptors and nervous system receive and represent stimulus energies from our environment. For the 2015-2017 Ford F-150, common problems range from interior mishaps to issues with functional components. 2015 Ford F-150 problems have largely centered on transmission issues that lead to rough shifting. Ford F-150 problems in 2016 models also include engine problems. Ford truck transmission problems have frequently arisen in newer F ...

Common Ford Truck Problems by Year | Ford F-150 Issues

Engine Oil After fuel (unless you have a fancy EV), oil is your car's most important fluid. Engines components spin thousands of times a minute, and it's oil that keeps everything moving smoothly.

How to Check the 6 Essential Fluids in Your Car

Your legs may also feel cool to the touch, and the skin may look pale. A stroke occurs when blood flow to a part of the brain stops. A stroke is sometimes called a "brain attack." Symptoms of stroke can include difficulty moving the limbs on one side of your body, one side of the face drooping, difficulty with speaking or understanding language

Warning signs and symptoms of heart disease: MedlinePlus ...

An engine that hesitates when accelerating is either sucking too much air, not getting enough fuel, or misfiring. Here's what you might discover—and what you can do to fix the problem: Dirty air filter. The Fix: Replace the air filter. The spark plugs may be dirty or worn. The Fix: Replace spark plugs. The ignition wires may be bad.

Why Does My Car Hesitate When I Press the Gas?

When you can tell the difference between candy apple red and fire engine red, it is partly because the light stimuli differ in their _____. wavelengths The clear membrane just in front of the iris through which light first passes is the _____.

Flashcards - GenPsych CH5

Back when carburetors were king and fuel pumps were mechanical, power loss usually came down to vapor lock or a clogged fuel filter [source: Goms]. Today's intricate fuel systems have largely conquered the former if not the latter. Even so, all that complexity brings with it a slew of potential failure points. The same goes for the car's air ...
